ZONE MEDICAL

Zone Medical is dedicated to bringing the best in medical equipment to health practitioners. Zone Medical cares about the patient experience and seeks to deliver technological solutions which enhance health services, eases the burden on medical personnel and improves patient outcomes.

Established in 2004, the company has been providing medical equipment solutions and health services technologies for over seven years within Australia, New Zealand and internationally. Today, Zone Medical has grown to become one of Australia's leading suppliers of sterilisation and medical electrical equipment. Our product range has increased significantly and we are able to provide the best, most technically advanced equipment on the market today.

Zone Medical specialises in developing a tailored solution in direct consultation with its customers. The company is committed to delivering the best patient outcome in every solution it offers. Zone Medical is driven by its success of building and maintaining a satisfied customer base through superior quality and customer service. The company is certified to ISO9001 and ISO13485 standards.

Specials - *Look out for the red circle for some great promotional deals. We also have great competitions and giveaways.*

Rental Options - *Visit www.zonemedical.com.au to calculate your cost. All prices are indicative. Please contact us directly for an exact quote. Payments could be up to 100% tax deductible to business users.' Conditions apply.*

www.zonemedical.com.au *has great deals that are always changing. Be sure to check reguarly. Some equipment is even cheaper when purchased online.*

Recieve free freight *when you spend over $200 dollars at our webstore with Credit Card*
**Conditions apply.*

Full Technical Support & National Service Network. *Zone has fully trained staff & service technicians ready to help you...wherever you are.*

We'll give you a free trial for some products.
To be returned to Zone Medical within 7 days. Must be returned in same condition as supplied. Return of freight at cost to customer. Charges may apply.

Extended Warranty Option - *Keep an eye out for extended warranty's & warranty options. All products come with at least 1 year parts and labour warranty as standard unless otherwise stated.*

Nellcor compatibilty - *Many of our products are compatible with Nellcor sensors and probes.*

STERILISERS

Cominox Sterilisers

Easy - The LCD display and user interface makes it easy to use, it will tell you exactly what's going on, what's happening next and when it requires maintenance, simple, easy & reliable

Low training required - The Cominox range, once configured and validated, only requires the push of a single button to start a cycle - there is no need to spend hours training new staff.

Intelligent - The Cominox series cleverly manages much of its own advanced technology, leaving you to load the trays, close the door and push a button.

Standards - Cominox comes with pre-loaded cycles that meet or exceed both European and Australia's stringent standard requirements.

Convenient - The Pre-programmable start function allows you to schedule your steriliser to start just before you get in each morning - there's no loads sitting overnight after being processed.

Customisable - If you have a need for a special cycle that better suits your specific requirements, it's easy for you to set your own parameters.

Support - National network of fully trained and qualified service agents.

Low Ongoing Cost of parts in scheduled maintenance are comparatively inexpensive when looking at many competitor brands. Initial build quality ensures components are not over-stressed through normal use.

S Class Dynamica	S Class	B Class	B Speedy (6 &18 Litre)
• Entry level Steriliser • To be used where time constraints are not an issue • Does not process hollow A instruments	• Designed for medical applications to process solid & hollow B instruments • Perfect for podiatrists and GP's	• Heavy duty unit for processing large hollow A instruments & porous or linen fabrics • Large vacuum pump • Required for dentists	• Ultra fast unit • Built in steam generator & Vacuum pump • Designed to process hollow A instruments as fast as possible

STERILISERS

Celitron Sterilisers

Outstanding Performances - Air removal via a powerful vacuum system, using a liquid ring vacuum pump and a condenser or large dry vacuum pump.

Large Capacity - Models from 24 - 200 Litres, as well as varied chamber dimensions according to specific demands.

High Technology - Simple operation using a high-tech computerized control system.
Optional powerful PC Windows based Software is available for monitoring, logging, control and service.
Colour Graphic Touch Screen Display and an ergonomic User Interface.
Sterilization cycles' data collected realtime on a SD card. The most advanced interface connections: Ethernet, USB, RS232 and RS485.

Support - National network of fully trained and qualified service agents.

Easy to use -Fully automatic door locking. Open and close the door by pressing only one button. RO water purification system available. A friendly graphic user interface with touch screen.

Environmentally Friendly - Energy saving mode reduces power consumption. Water saving system is available to reduce the amount of water used during cycles . Paperless recording using a SD card.

Customisable - The Pre-programmable start means that you can schedule your cycle to start just before you get in each morning - there are no loads sitting overnight after being processed.

Celitron Sting Premium II - 24 Litre B Class Steriliser

The Sting Premium II is a fully automatic high-speed pre & post vacuum Steam Steriliser, designed for sterilisation of wrapped materials, hollow instruments and porous loads in hospitals, private clinics and dental offices. This Sting 11B Bench-Top Steriliser is equipped with a built-in mini steam generator and a powerful vacuum pump. Closing and opening of the door is automatic. The chamber's volume is 23 litres, jacketed. External dimensions are especially suitable for small clinics. The design is modern, the unit is reliable, incorporates high-tech features and is based on more than 20 years of experience in the sterilisation field.

- Colour LCD touch display
- One stainless steel tray rack
- 4 x large stainless steel trays (6 tray option)
- One tray holder
- Built in steam generator
- Vacuum assisted
- Impact printer
- USB SD card reader & SD card
- Log viewer software
- PC based cycle recording software
- Door opens and closes automatically
- Unit dimensions: 534x475x609mm

BIOLOGICAL WASTE TREATMENT

Celitron Integrated Steriliser & Shredder (ISS)

Celitron's compact medical hazardous waste solution, the Integrated Sterilizer & Shredder, is a large steam steriliser with an integrated shredder, designed for on-site conversion of biohazard waste in hospitals and clinics.

- Large steam steriliser with an integrated shredder
- Safe to dispose of as regular municipal waste after treatment
- Total cycle time approx 25 minutes for 15kg-25kg of waste
- Reduces waste to 20% of original size
- Internal sprinklers for automatic Cleaning
- Automatic opening & closing of the door
- No risk of contaminated water as waste is dehydrated
- Does not emit harmful substances
- No need for costly biological waste collection
- Fraction of the price of similar systems
- Cost-effective – Inexpensive operation and maintenance.
- Easily and quickly installed

CELMWD

Huge 150 Litre Chamber

Unit Exterior

Loading position

Operating position

Fraction of the price of similar systems

Turn hosptial waste into everyday rubbish

Performs both size reduction and waste disinfection in a single vessel

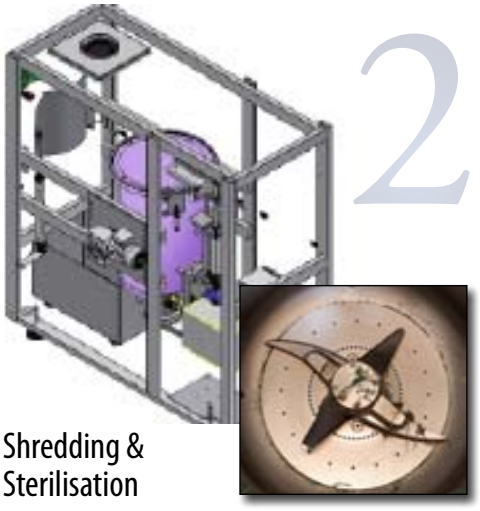
The entire process is automatic, opening & closing of the door, turning & rotating of the vessel & the sequences of shredding and sterilization

1

Waste Collection

Load up to 25kg of sharps, dialyzers, syringes, papers, cloth, plastic, glass etc into ISS's 150 litre chamber and begin the shredding & sterilisation process. The automatic locking door prohibits unauthorized interruption.

2



Shredding & Sterilisation

The stainless steel vessel is fitted with a motor-driven shaft, with powerful shredding/crushing blades that rotate in two directions to reduce the size and volume of the waste down to 20% of its original size.

Shredding is important as it enhances the steam penetration therefore improves the overall steriliSation process.

3

Auto disposal of Treated Waste

After treatment, the waste is sterile. The liquid components are steamed out of the vessel, re-condensed and drained to a municipal sewer. As the waste is dehydrated, there is no risk of contaminated waste water.

The waste is rendered, fragmented, non toxic, largely solid and dry and therefore safe to be disposed as regular municipal waste.

EXAMINATION COUCHES

Examination Couches/Tables/Stools

Zone Medical has large range of medical couches, tables, stools etc, suitable for Examination, Treatment, Beauty & Massage, Podiatry Rehabilitation & Speciality applications. We have many different variations to each model. Below are a few examples of our range. There are far too many list all of the options here. Please contact Zone Medical for any additional information or specifications you may require.

Fixed Height Metal Plinth Two Section

Ideal for First Aid Rooms, as a Strapping Table or for General Treatments and Examinations. Designed to help keep the working area free from clutter our Fixed Height Metal Plinths are made to take the rigours of heavy duty everyday use in any practice.

- Maximum Working Load: 200kg
- Maximum Working Height: 770mm
- Table Width: 610mm
- Table Length: 1830mm
- Cushioning: 50mm Enduro Foam
- Covering: Vinyl Upholstery
  (with PreFixx protective finish)

HEA5004

Adjustable Height Metal Plinths

Ideal for First Aid Rooms, as a Strapping Table or for General Treatments and Examinations. Designed to help keep the working area free from clutter and to conform to the operational height requirements of various practitioners.

- Maximum Working Load: 200kg
- Maximum Working Height: 800mm
- Minimum Working Height: 540mm
- Table Width: 610mm
- Table Length: 1830mm
- Covering: Vinyl Upholstery
  (with PreFixx protective finish)
- Cushioning: 50mm Enduro Foam

HEA6341

Healthtec Southern Cross 3 Section Treatment Table

A cost effective sturdy Australian made table built to last offering a generous lifting capacity. The motor is covered by an impressive 5 year warranty, and moves quietly from low to high in just 20 seconds, enabling the practitioner to get the patient positioned quickly.

- Maximum Working Load: 250kg dynamic load (moving)
- 450kg static load (stationary)
- Minimum Working Height: 540mm
- Maximum Working Height: 860mm
- Table Width: 700mm
- Table Length: 1930mm
- Hi-Lo Time: 20 seconds
- Cushioning: 50mm Enduro Foam
- Covering: Vinyl Upholstery
  (with PreFixx protective finish)
- Base/Castors: X-Frame with Wheels
- Footswitch: Single Footswitch (Hi-Lo function)
- Frame: Powder Coated Rust Resistant,
- Steel Frame

HEA56251

Eco GP Universal Examination Table

Designed to comply with RACGP recommendations. Ideal for the budget conscious practitioner who needs a reliable sturdy table built to last with a generous lifting capacity. The ECO Universal Examination Table is designed so each end section can be raised to provide a backrest for left and right patient examinations and procedures.

- Maximum Working Load: 200kg dynamic load (moving)
- 400kg static load (stationary)
- Minimum Working Height: 475mm
- Maximum Working Height: 935mm
- Table Width: 720mm
- Table Length: 1930mm
- Cushioning: 50mm Enduro Foam
- Covering: Vinyl Upholstery
- (with PreFixx protective finish)
- Base/Castors: Optional Ezy-Move Wheel System
- Footswitch: Single Footswitch (Hi-Lo function)
- Frame: Powder Coated Rust Resistant,
- Steel Frame

HEA54060

Universal Stools

Ask us about our range of Hi-Lo Stools. With various options like backrests, round seats or saddle-tops, there is a large array of operational heights and huge choice of colours. These stools are ideal for any practice.

- Cushioning: 50mm Enduro Foam
- Covering: Vinyl Upholstery
- (with PreFixx protective finish)
- Base/Castors: Black Base / 5 leg castors
- Easy to maintain
- Extremely stable
- Sturdy construction

ULTRASONIC CLEANERS

Sonica Ultrasonic Cleaners

Using ultrasonic energy and a process known as cavitation, ultrasonic cleaning is the most effective way of deep cleaning difficult to reach and complex shaped items. The new range of SONICA S3 are equipped with state-of-the-art high power piezoelectric transducers and ultrasonic generators which incorporate the innovative SweepSystem oscillation technology for a truly amzing result.

Sweep System Technology

The new SONICA S3 series with Sweep System technology offers the best performance available from ultrasonic cleaning equipment. The state-of-the art generator incorporates a special ultrasonic oscillator using Sweep System Technology. The frequency from the ultrasonic generator operates around a central frequency of 39 Khz and the transducers shift between 38 and 40 Khz.

Control Panel (All Models Include New Sweep System)

Version M - up to 15 minute manual timer

The simplest version in the SONICA range is equipped with a timer which can be set for up to 15 minutes. It can also be set to manual operation.

Version MH - up to 15 minute manual timer with 60c Heater

Is equipped with a timer which can be set for up to 15 minutes and can also be set to manual operation. The thermostat for the heater is set at 60°C. Sweep System generator included.

Version ETH - electronic timer and temperature control

Cleaning times and temperatures controlled electronically by a microprocessor. Waterproof control panel.

Version EP - Sweep System Generator

The most technologically advanced of the SONICA range: modern digital display control panel; degassing time setting; cleaning times from 0 to 99 minutes; tank liquid temperature setting up to 70°C; storage capacity for up to 10 cleaning programmes; Jet program function allows for quick and easy cleaning cycles.

Sweep System Technology gives:

- Faster cleaning
- Increased distribution of ultrasound energy
- Damage free cleaning
- Better cleaning
- Improved cavitation

PULSE OXIMETERS

Biolight M800 Handheld Pulse Oximeter

- Auto rotation Hi-Res 2.4" colour OLED display: 320x240 pixels
- SPO2 and PR monitoring (ECG optional)
- Suitable for Adult, Pediatric & Neonatal patients
- Spot check and continuous monitoring modes
- Max 60,000 group short trend data store & review
- 16 hours of continuous SpO2 & ECG monitoring on 3 xAA alkaline (lithium battery optional)
- Size - 58.5mm(W) x 123 mm H x 28mm (D) - Weight -< 200g

Option:

1. *Child reusable sensor*
2. *3 Lead ECG Module & Cable*
3. *Lithium battery & Cradle*
4. *Carry Bag*
5. *Infrared Receiver to CPU*
6. *PC Software*
7. *Silicone Jacket*
8. *Disposable sensors for adult, pediatric & neonates*

BIOM800KIT

Choicemed OLED Fingertip Pulse Oximeter - Adult

- Dual colour OLCD display
- SpO2, PR, Pleth waveform, Pleth Bar
- Accommodates widest range of finger sizes from paediatric to adult
- Multi-direction display (6 modes)
- 30 hours life on 2 x AAA batteries
- Automatic power off

CHOMD300C21

FREE

SILICONE COVER & PROTECTIVE CARRY CASE WITH BELT CLIP

Choicemed LCD Fingertip Pulse Oximeter - Child

- For children 4 weeks to 12 years of age
- LED display; Finger tip sensor
- SpO2 , PR, Pulse bar, Plethysmogram
- 30 hours life on 2 x AAA batteries
- Auto Power Off

CHOMD300C54

MIR Spirodoc 3D Pulse Oximeter

- Advanced Pulse-Oximetry analysis: (6 Minute Walk Test / Sleep test / Spot test / 24h Holter test)
- Triaxial accelerometer to detect the smallest patient movements (for Rehab, daily activities, 6MWT and Sleep test)
- 1,000 hours of Pulse Oximetry memory

3d OXIMETER

6 minute walking test printout

SPIROMETRY

MIR Spirodoc 3D Oximeter & Spirometer

4 devices in 1 single pocket size unit: Spirometer + Pulse Oximeter + Accelerometer + Patient Diary
Extremely detailed and accurate - Stand alone and PC connection for real time tests

reddot design award winner 2010

MIR910610

*Spirometry Display

FEATURES

- Back-light touchscreen display (with intuitive icons for patient name and data insertion)
- No Calibration required due to factory calibrated turbines (ATS/ERS standards)
- Export PDF for import to patient record software
- Range of Spirometry test - FVC, VC, IVC, MVV, PRE-POST
- Precise spirometry interpretation even post bronchodilator.
- All results shown on the display during and after the test
- Stand alone testing on device or real time on PC.
- Automatic BTPS conversion with inbuilt temperature sensor
- Advanced Pulse-Oximetry analysis:
  (6 Minute Walk Test / Sleep test / Spot test / 24h Holter test)
- Triaxial accelerometer to detect the smallest patient movements (for Rehab, daily activities, 6MWT and Sleep test) according to the latest international recommendations .
- Huge memory for long term test recording. 10,000 Spirometry tests or 1,000 hours of Pulse Oximetry
- Rechargeable (high capacity lithium batteries)
- Telemedicine ready

Option:

1. *Disposable turbines x 50 box (MIR910004)*
2. *Reusable turbine (MIR910002)*

3d OXIMETER

MIR Spirolab III

Spirolab III is a multitasking and versatile spirometer ideal for accurate and early diagnosis of respiratory diseases (like COPD and Asthma). Spirolab III is easy to use for family doctors screening, pharmacy quick tests, teleconsulting and paediatric patients .

- 3rd generation diagnostic spirometer with oximetry (optional) and high-res colour display (320x240 pixel)
- Up to 8 tests on screen at one time, 6000 Spirometry test or 1000 hours oximetry memory
- USB and Rs232 connections, fast & quiet 112mm in-built thermal printer
- Oximetry Option - Different types of oximetry tests including sleep and exercise tests
- Internal rechargeable battery and/or mains operation, automatic BTPS correction
- Full alpha-numeric keyboard for fast and easy data entry
- Carry case, PC connection, 50 disposable turbines & WinSpiro Pro Software included as standard
- Never requires calibration, can upgrade to disposable turbines (MIR910004)
- Weight 1.9kg / Size: 310x205x65mm
- Comes with 10 Disposable Turbines

Option:

1. *B&W display with 50 disp turbines (MIR910655D10)*
2. *With SpO2 Option, colour display (MIR910651D10)*
3. *Paper Roll - pack of 10 (MIR910350)*
4. *Disposable turbines x 50 box (MIR910004)*
5. *Reusable turbine (MIR910002)*

SPIROMETRY

MIR Spirobank USB

- Pocket-size diagnostic spirometer ideal for spot screening
- B&W 120x32 pixel graphic display with flow/volume shown
- FVC, FEV1, FEV6, FEV1/FVC%, PEF, FEF25-75%, Auto BTPS,ELA
- Stand alone testing with upload to PC
- Upgradeable internal software, USB connection
- 9v battery included for portable operation,
- Carry Case, PC Connection and WinSpiro Express Software included
- Never Requires Calibration
- Supplied with 10x disposable turbines
- 180grams - 162x49x34mm

Option:

1. *Disposable turbines x 50 box (MIR910004)*
2. *Reusable turbine (MIR910002)*

HALF PRICE

MIR910513D10

MIR Spirobank G USB

- Stand alone or PC Live on-screen with WinSpiro Pro
- 6000 Spirometry Test Memory and Built In BlueTooth, USB and RS232
- FVC, VC, IVC, MVV, PRE-POST BD, lung age estimation, Auto BTPS
- Advanced Spirometry Test Interpretation
- 9v Battery Included for Portable Operation,
- Direct Printer Connection via in-built Bluetooth
- Carry Case, PC Connection and WinSpiro Pro Software included
- Never requires calibration, can upgrade to Disposable Turbines (MIR910004)
- 180grams 162x49x34mm

Option:

1. *Disposable turbines x 50 box (MIR910004)*
2. *Reusable turbine (MIR910002)*

with 10 disposable turbines

MIR910512D10

MIR 50 - Disposable Turbines

- Simple, accurate & Hygenic
- Factory calibrated - never needs calibration
- Zero risk of cross contamination
- Individually wrapped
- Unique world wide patented design
- Includes cardboard mouthpiece

MIR910004

MIR Reusable Turbines

- Reusable Turbine flow meter with mesh
- High accuracy
- Long term stability
- Easy to clean

MIR910002

Hans Rudolph Spirometer Calibration Syringe

- 3L Syringe 5530 with 30mm OD Taper (suit MIR, Cosmed) - HAN113259
- 3L Syringe 5570 with 32mm ID 38mm OD Taper (suit Ndd Easy One, QRS SpiroCard) - HAN113416

Everpure - ABS Nose Clip

- Made of ABS
- Multiple colours available
- Disposable

PACK OF 10

EVENOSECLIPPK10

MIR Winspiro Pro Network Edition (Includes 5 Workstation Licenses)

- The most complete spirometry software package available today
- Includes FVC, VC, MHV and a whole lot more
- New web browser and XP based user interface (Windows XP, VISTA and Seven compatible)
- Simple, single-screen patient spirometry summary with dynamic management of all data and curves
- New and intuitive hyperlinked spirometry curves
- Bronchial challenge and bronchial dialator protocols, with "one click" operation
- Direct email of spirometry data and curves
- Network ready software with powerful SQL database, for large-scale data collection
- Suitable for clinical trials and telemedicine applications
- Direct hyperlink to MIR web site for easy access to software updates, services etc
- Includes internal software upgrade for your MIR spirometer
- Amusing user-selectable paediatric incentive screens and animations

MIR920215

Rimsa Penta 12x LED Operating Light

PENTALED12 completes an already wide range of high quality Italian made LED lamps and can meet the needs of a surgery and diagnostic environment. PENTALED12 is different from other lights thanks to its very new ergonomic design, two handy side handles assure extremely easy positioning and handling, and the flat reflector minimises overall dimensions.

- Ergonomic design, two handy side handles assures extremely easy positioning
- Powerful and efficient LED technology
- Lights up the work area thoroughly and suppresses all shadows
- High light intensity that does not dazzle (over 50,000 lux at a distance of 1m)
- Cold light - low temperature generated for the doctor and patient's comfort.
- 50,000 - 100,000 hrs bulb life
- 4 axis rotation

Option:

1. *With mobile stand - (RIMPENTA12PI)*
2. *With ceiling mount (RIMPENTA12SO)*
3. *With wall mount - (RIMPENTA12PA)*
4. *Twin set ceiling mount - (RIMPENTA1212)*

Ergonomic

G.Comm Polaris LED Dental Light

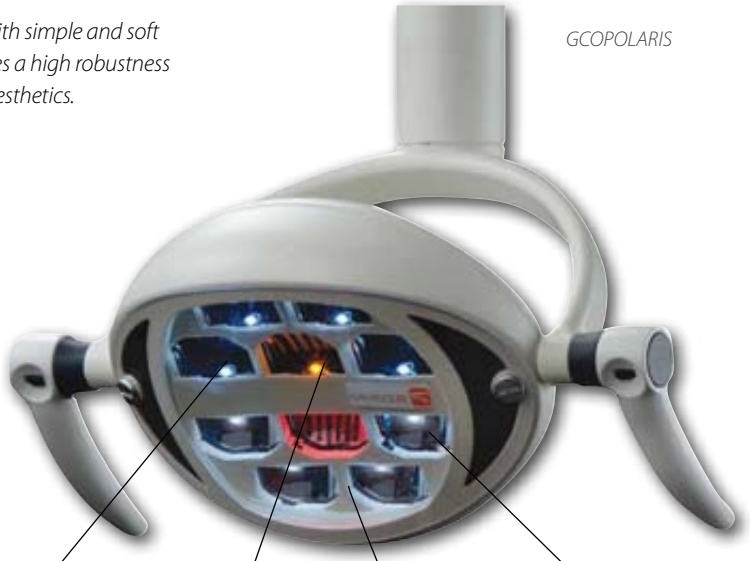
Made and designed in Italy the POLARIS is characterised by advanced design with simple and soft lines. The shell is made entirely in aluminium and powder coating, which assures a high robustness and gives optimal cleaning and hygiene: a perfect union of functionality and aesthetics.

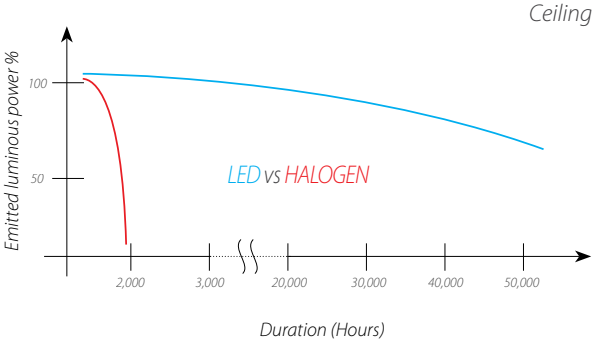
- Ergonomic handle for precise & intuitive positioning
- Cooled by heatsink (no fan)- no moving parts, no faults, no noise
- Regulate colour temperature from 4,200°K - 6,000°K
- Easy cleaning & disinfection
- Extremely energy efficient 20W LED white ligh
- 50,000 - 100,000 hour LED life
- No UV output & minimal infrared
- Adjustment of light intensity 8,000 - 35,000 lux
- Cold white light for comfortable treatment
- No UV radiation - No aging of the skin, not danger

Wall mount

Ceiling mount

GCOPOLARIS





Heat free cold light for patient comfort

Patented colour temp system 4,200°K - 6,000°K

100 light fields means no shadows

Low power/ high intensity up to 35,000 Lux

LIGHTING

LID 17W 12xLED Lamp With Flexible Neck

- Perfect for minor surgery, dermatology, gynecology, intensive care
- Ergonomic handle for precise & intuitive positioning
- Cooled by heatsink (no fan) - No moving parts, no faults, no noise
- 50,000 - 100,000 hour bulb life - No UV output & minimal infrared
- 50,000 Lux at 30cm
- Easy cleaning & disinfection
- Extremely energy efficient white light
- Class II double isolation
- 860mm neck
- Suitable for all mounting brackets

Mobile Stand

LIDLED17860

LID 7xLED Lamp

- 50,000 hour life - Never change a bulb again!
- Excellent light without Heat or U.V.
- Cooled by heatsink - No moving parts, no faults, no noise
- 7w with 7 light sources
- 27,000 Lux at 50cm
- 1000mm neck

Mobile Stand

LIDLED71001

LID Halogen Lamp 20W

- Powerful and comfortable to use
- 9,000 Lux at 50cm
- 5,000hr bulb life
- 900mm neck
- 23,000 Lux at 50cm
- Suitable for all mounting brackets

Mobile Stand

LIDHTI101001B

LID Halogen Lamp 50W

- Dimmer and positioning handle
- 15,000 Lux at 1 meter
- Made in France - Highly reliable
- Lifetime Guarantee for flexible arm
- 1000mm neck
- 50,000 Lux at 50cm
- Suitable for all mounting brackets

Mobile Stand

LIDBOR51001VBOFFER

LID 3xLED Lamp

- 50,000 hour life - Never change a bulb again!
- Very low power usage - 4.2w with 3 light sources
- Excellent light without Heat or U.V.
- Cooled by heatsink - No moving parts, no faults, no noise
- 900mm neck
- 12,000 Lux at 30cm
- Suitable for all mounting brackets

Mobile Stand

LIDLEDB0900NOFFER

LID Fluro Magnifying Lamp 22W

- Heat free white light
- Extremely flexible neck
- 22 Watts - 7,500 hours
- Temperature colour: 4500° K
- Clamp provided

Rimsa 6xLED Examination Light

- Perfect for skin and heat sensitive areas
- The forefront of modern practice lighting
- Cold light lamp with led technology
- 6 white LEDs of 2.5W each. 24V
- 30,000 lux at 50 cm distance
- With glass lens to optimise the light performance
- Many independent light sources assure shadowless light and low radiated energy temperature
- Castor Base included

Option:

1. *Table Clamp (RIMS11)*
2. *Wall Clamp (RIMS12)*

RIMESALEDRL

Rimsa Penta 9xLED Minor Surgery Light

- Light intensity at distance (Ec) Lux 100,000
- Light reflector gives easy handling & stability
- Total suppression of shadows
- Colour temperature of radiated energy °K = 4.500
- Power LEDs W N. 9 x 2.5 W
- Average LED life = 50,000 hrs
- Mobile stand included

Option:

1. *Ceiling Mount (RIMPENTAIXSOF)*
2. *Wall Mount (RIMPENTAIXPA)*

RIMPENTAIXPIFF

Rimsa Penta 30xLED Minor Surgery Light

- 30 elliptic reflectors divided in 6 modules with 5 LEDs each
- Excellent performance
- Three-dimensional lighting and elimination of all shadows
- Average LED life of 50,000 hrs
- Outer reflector diameter 40cm
- Elliptic reflector diameter 5.5cm
- Mobile stand included

Option:

1. *Wall Mount (RIMPENTA30PA)*
2. *Ceiling Mount (RIMPENTA30SO)*
3. *Twin Ceiling mount (RIMPENTA3030SO)*

RIMPENTA30PI

Rimsa Penta 30ExLED Minor Surgery Light

- New E-Series features E-Deep, Endo LED, E Glass and cold light technology
- E-VIEW Electronic Adjustable illuminated field
- Three-dimensional lighting and elimination of all shadows
- 30 Eliptical reflectors providing 130,000 LUX
- Average LED life of 50,000 hrs
- Outer reflector diameter 40cm
- Mobile stand included

Option:

1. *Mobile Stand (RIMPENTA30EPI)*
2. *Wall Mount (RIMPENTA30EPA)*
3. *Ceiling Mount (RIMPENTA30ESO)*

RIMPENTA30PI

Minxray Portable Digital Radiographic System

The is a complete mobile direct radiography system featuring a Varian DR Imaging Panel integrated with a MinXrayHF120/60HPPWV PowerPlus™ portable x-ray unit.

- Rugged construction yet light and compact
- Easily transported between sites
- Set up in less than 1 minute
- Image acquisition in less than 10 seconds
- Superior resolution
- Images easily processed, stored and transmitted

Installation & Training Provided

The system includes:

- HF120/60HPPWV PowerPlus™ High Frequency Portable X-Ray Unit
- PaxScan® 4336R Digital Imaging Panel**
- E6400 XFR Laptop Computer
- MinXray DXR Imaging Software
- XGSMKV Gas Spring Portable Mobile Stand with 16" wheels
- Reina DR Grid - 6:1 ratio, 103 lpi
- Transport Case
- Approximately 81.8 kg assembled with x-ray

MINCMDR2S

OEC LED X-Ray Viewers

- SMD LED backlight source
- High brightness, maximum over 4000cd/m^2
- Ultra-thin, whole structure thickness only 21mm
- Aluminium alloy frame
- Innovative film insertion
- Even light distribution
- Clear, flicker free, no dark zone, no eye strain

ULTRA THIN DESIGN 21mm THICK

Single Bay - 436mmL x 488mmH (CHIXRAYLED1)

Double Bay - 792mmL x 488mmH (CHIXRAYLED2)

Fluro X-Ray Viewers

- Bench and wall surface mount models
- Flush mount wall models
- Excellent light diffusion and uniform illumination is achieved from: circular fluorescent tubes, continuous opal perspex viewing panel & internal white reflector surface
- Stainless steel strip contains grip rollers to hold X-rays
- Each individually switched bay is internally divided
- White powder coated steel cases are simple to clean
- Actual illuminated panel size:
- -single bay 335 mm (L) x 400 mm (H)
- -double bay 710 mm (L) x 400 mm (H)
- -double bay 1085 mm (L) x 400 mm (H)
- -double bay 1460 mm (L) x 400 mm (H)
- Case depth is 105mm

Single Bay - 377mmL x 500mmH (DAL1600)

Double Bay - 750mmL x 500mmH (DAL1601)

3 Bay - 1125mmL x 500mmH (DAL1602)

4 Bay - 1500mmL x 500mmH (DAL1603)

PORTABLE ULTRASOUND

WED-3000 Handheld Diagnostic Medical Sonography

Palmsmart WED-3000 is the latest model by WELLD,weighting only 1.3KG,is distinguishable by its bright and clear image quality. The interchangeable probes offer a wide range of diagnostic applications.This scanner is a cost effective solution for family doctors,veterinary scanning.The complete software and the high product versatility are available in it.

- Scanning Method: Convex, Micro-convex, Linear, rectal
- Display Mode: B, B+B, B+M, M
- Gray Scale: 256 levels
- Monitor: 6.4 inch TFT color LCD
- Image Procession: DFS, DRF, RDA, VGA/DSC and Image Post Procession
- 128 frames for cine-memory, 32 image permanent storage
- Image magnification: ×1.0, ×1.2, ×1.5, ×2.0 times
- 4 focusing combination selectable, 4 different coded-color available
- 15 difference kinds of body marks with difference calipers.
- Measurement in Distance, Circumference/Area, Time/Heart Rate/EF rate for heart, and GS, CRL, BPD, HC, FL, AC for OB/GY measurement, and Gestational Age, Fetal weight, EDD calculation.
- Characteristic showing in real-time clock, ID, Sex, Age, Focusing Info and Gain (Near, Far, Overall) info.
- PAL-D output
- Mouse interface

WED-3100 Handheld Diagnostic Medical Sonography

- 5.0 inch TFT LCD
- Easy-to-use GUI menu
- Low power consumption
- USB 2.0 For real-time picture uploading to PC
- Full digital beamforming technology
- Probe automatic identification
- Gama correction, Color encode, Image Smoothen
- Scan Model: Convex, Linear, Micro-convex
- Display Model: B, B+B,B+M,M, 4B
- Scaning Depth: 80~220mm
- Bulti-in Memory: 128 images
- Cine Loop: 400 frames
- USB2.0, SVGA,

Welld 160 Full Digital Ultrasonic Diagnostic System

This device is suitable in hospitals and clinics for diagnosing liver, GB, spleen, kidney, pancreas, heart, bladder, uterus etc.

- Windows XP operation system based
- 4 sets of scroll menus mouse control friendly
- Ultrasound Work-Station managing system
- Powerful measurement & calculation software packages
- Patient data managing system
- THI(tissue harmonic imaging)
- 4X images
- Pseudo color
- Dicom 3.0

PORTABLE ULTRASOUND

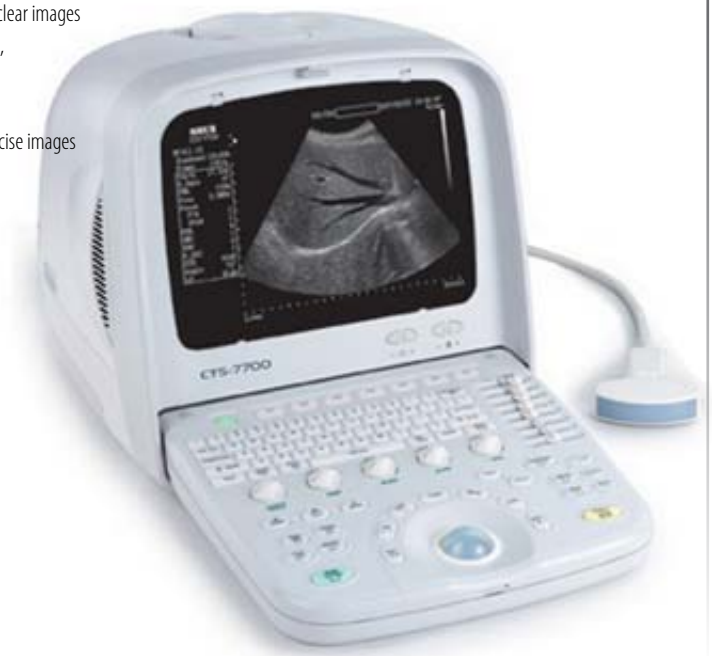
Siui CTS 7700 - Portable Digital Ultrasound

The SIUI CTS-7700 digital diagnostic ultrasound scanner is a compact PC based system featuring outstanding technology that will enable the user to fulfil the present and future requirements for diagnosis within the ultrasound field. A powerful system able to run a range of Linear, Convex and Microconvex probes. Excellent Image quality coupled with storage to hard disc or USB, comprehensive software and multi-frequency probes make this an excellent combination of cost and performance.

- Compact portable Hi-Res 10.4" LCD Monitor with rich colour & chroma display
- Full digital beam forming technology for real time, crystal-clear images
- Powerful PC & Ultrasound hybrid for high computing speed, powerful signal processing & easy upgrade capability
- Speckle Reduction Technology (SRT)
- Advanced Graphics Processing (GPU) for fast, smooth & precise images
- PIP (Picture-in-Picture) Function
- One touch operation & user defined function keys
- Powerful Document Management & Storage Capacity
- OB, Abdominal, Urological, Gynecological, Orthopedic, Peripheral vascular, Cardiac, Small Parts
- 2 USB ports, 2 probe connectors
- Variable image orientation
- Smart tracking function
- Broadband convex probe (2.5/3.0/3.5/4.2/5.0MHz)

Optional:

1. *DICOM3.0 port software*



SIUCTS7700

Accessories:

1. *B&W Video printer*
2. *Foot Switch*
3. *Mobile Trolley*
4. *Printing Paper*

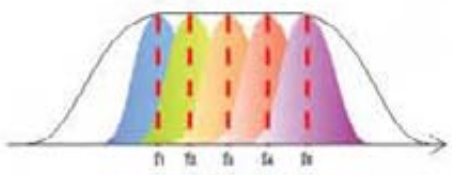
Hi Density, Broadband, Five-Frequency Probes



The system Is configured with light density broadband multi-frequency probes. Probe frequency can be switched quickly by pressing one console button only, enabling doctors to select the right frequency for specific diagnosis and patients. Image resolution and penetration is significantly optimised.

Siui CTS 8800 Plus - Premium Portable Digital Ultrasound

The SIUI CTS-8800 portable ultrasound unit combines the latest in ultrasound imaging technology with portability. It is extremely easy to use for all users and features a stable operating system with a 160 gig-hard drive. Capable of producing 4D black and white images at the fraction of the cost of its competitors, the SIUI CTS-8800 is the most cost-effective 4D ultrasound imaging equipment on the market today.

- High Resolution ultra wide field of view 10" LCD monitor & backlit keyboard
- Extraodinary imaging performance, in a robust system
- Ergonomic design for a convenient and comfortable experience
- Biplane Imaging with Multi-angle Biopsy
- Complete OB/GYN clinical application software
- Full digital imaging
- TGC Gain Sliders
- Speckle Reduction Technology (SRT)
- Compound Imaging, Trapezoidal Imaging, B mode Steering
- Broadband multi-frequency probes
- 1024 frame Cineloop
- 4D and 2D imaging
- Picture-in-Picture zooming
- 2 USB ports, 2 probe connectors
- Broadband convex probe (2.0/2.5/3.3/4.2/5.0MHz)
- Broadband 4D convex probe (4.0/4.7/5.5/6.2/7.0MHz) and software (option)

Optional:

1. *DICOM3.0 port software*
2. *Pulsed Wave Doppler*
3. *4D Ultrasound*

Accessories:

1. *B&W Video printer*
2. *Foot Switch*
3. *Mobile Trolley*
4. *Mobile trolley CR-11L (with 15" LCD monitor)*
5. *Printing Paper*

Simple & Quick Real-time 3d (4D) Operation

Unlike complicated operation in traditional real-time 3D (4D) ultrasound imaging, the CTS-8800 adopts simple & quick operation method. With just a few simple steps, the real time 3D (4D) ultrasound images can be easily obtained. The CTS-8800Pius offers excellent 4D imaging at reasonable price.

PORTABLE ULTRASOUND

Siui Apogee 1200 - Smart 4D Colour Doppler Ultrasound

For most hand-carried ultrasound systems image quality has been difficult to achieve. With the Apogee 1200 the situation changes as it stores and processes raw data which improves image quality. Apogee 1100 is a hand-carried Colour Doppler imaging system which is compact and easy to use. It has both the advantages of mobile colour Doppler systems and portable systems: high resolution and powerful functionality.

- Colour doppler with Hi-Res 12.1" LCD monitor
- Multiple imaging technology with clinical applications
- Advanced Graphics Processing (GPU) for fast, smooth & precise images
- Speckle Reduction Technology (SRT)
- Tissue Harmonic Imaging (THI) enhances image resolution & reduces signal interferance
- Real Time Triplex - 2D images, colour images & spectrum images displayed synchronously
- Split B/Color Mode - compare 2D & colour images simultaneously
- Ultra-wide Field of View - 180° and 30cm depth (max)
- Color Steering function improves flow sensitivity
- M Zoom - Higher Intuitive analysis & accurate measurement
- 2 USB ports, 2 probe connectors
- Very powerful document management system
- Very compact, it weighs only 10 kg.
- Broadband convex probe (2.0/2.5/3.3/4.2/5.0 MHz)
- Broadband linear probe (5.0/6.6/7.5/10.0/12.0MHz)

Optional:

1. *Advanced Elastography*
2. *3D Imaging - rotate, zoom, trim, colour*
3. *Live Panoramic 4D Imaging*
4. *Compound Imaging*
5. *DICOM 3.0*
6. *Wifi Module*

SIUAP1100

Accessories:

1. *Mobile trolley CR-11*
2. *Mobile trolley CR-11L (with 15 inch LCD monitor)*
3. *Footswitch JT-2*

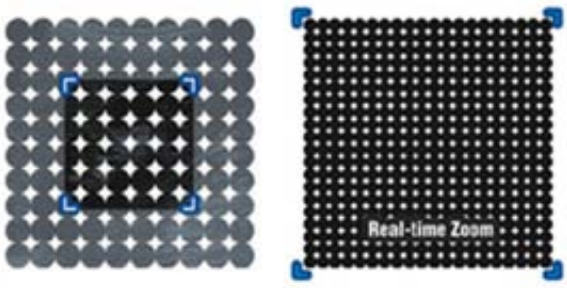
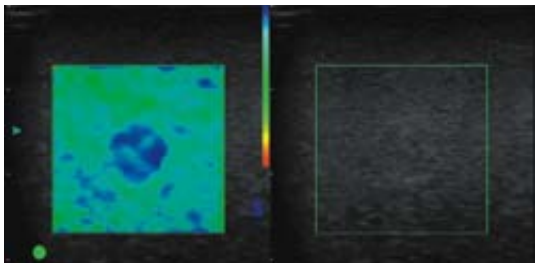
Unique High-Definition Zoom Function



X1.0 sampling point: 100/cm2

X2.0 sampling point: 400/cm2

Elastography (optional)



By compressing human tissue to obtain RF signals before and after compression, tissue deformation and elasticity status canbe acquired by time delay estimation, which can be used as a tool for cancer detection.

Siui Apogee 3500 Touch - Mobile Digital Colour Doppler Ultrasound

By integrating advanced imaging technologies such as digital beam forming, real-time continuous dynamic focusing, real-time dynamic aperture, dynamic apodisation and dynamic filtering, the user-friendly Apogee 3500 is suitable for general diagnostic procedures of the abdominal and cardic regions, as well as peripheral vessels and small parts. 3D/4D software is optionally available. Apogee 3500 offers different solutions for your clinical applications.

- High-precision digital imaging technology
- THI, real-time compound imaging, trapezoidal imaging, extended sector imaging
- Color Doppler Flow Imaging(CDFI), spectrum Doppler
- Versatile measurement and clinical diagnostic calculation function
- Built-in workstation with 8.4 inch touch screen
- 17-inch medical LCD monitor
- Strong image and file management system
- Hard disk imaging archiving, 2 USB ports & 3 probe connectors
- Tissue Harmonic Imaging (THI) enhances image resolution
- Speckle Reduction Technology (SRT)
- Trapezoidal Imaging
- Broadband convex probe (2.0/2.5/3.3/4.2/5.0MHTz)T
- Broadband linear probe (5.0/6.6/7.5/10.0/12.0MHz)

Optional:

MODULAR PATIENT MONITOR

Biolight A8 AnyView - Modular Design Multi-Parameter Patient Monitor

The ANY-VIEW monitors are used to monitor patient's physiological parameters such as ECG, Resp, SpO2, NIBP, IBP, Temp, CO2, AG and ICG continuously. They are intended to be used in various hospital rooms such as Coronary Care Unit, Intensive Care Unit, Neonatal Intensive Care Unit and Operating Room to provide additional information to medical and nursing staff about the physiological condition of the patient.

- 17" Color Anti-glare TFT-LCD (1280x1024 pixels)
- Powerful measurements, ergonomic and flexible design
- Dozens of parameters with variety modules can be addedd as needed
- Advanced modular monitoring
- Connects to independent large display for multi-display
- Long life Lithium battery
- Fanless cooling system
- 2G SD Memory Card
- 4 Module Slots
- 6 USB ports (peripheral devices interface)
- Arrythmia/ ST segment analysis,
- Size : 434mm x 389mm x 206mm
- Weight : <11kg

1. *Choose EMS or MPS Configuration (Required)*
2. *Add Module as needed*

BIOA8

Accessories:

1. *Touch Screen*
2. *Thermal recorder ((includes 1 roll of paper)*
3. *Printing Paper 50mm x 15m*
4. *Rolling Stand*
5. *Wall Mount*
6. *Bedrail Hook*

Biolight A5 AnyView - Modular Design Multi-Parameter Patient Monitor

- Hi-Res 12.1" colour TFT-LCD display (800 x 600)
- Powerful measurements, ergonomic and flexible design.
- Dozens of parameters with variety modules can be addedd as needed
- Advanced modular monitoring
- Long life Lithium battery
- Fanless cooling system
- 4 Module Slots
- Arrythmia/ ST segment analysis,
- 4 USB ports (peripheral devices interface)
- 2-TEMP+ NIBP + Adult accessory kit standard
- Size : 350×340×207MM
- Weight : ≤6.5kg

1. *Choose EMS or MPS Configuration (Required)*
2. *Add Module as needed*

BIOA5

Accessories:

1. *Touch Screen*
2. *LB-08 Lithium battery (11.1V/4000mAH)*

MODULAR PATIENT MONITOR

Biolight EMS/MPS All-In-One Module (Emergency Mobile Server)

- Seamless transport solution
- Provides fast and convenient monitoring during patient transfer with display, battery, alarm and storage capability.
- Patient's data transfers automatically when connected to AnyView Monitor,
- Extremely compact design, convenient to carry allowing patient to roam freely
- 3.5" Color TFT-LCD display
- Built-in rechargeable lithium battery

Biolight Advanced Modular Monitoring

ICG

Non-invasive method to measure patient's Cardio output & Hemodynamic status, safe & easy operation

2IBP

Max 8 IBP measure with waveform, Systolic, Diastolic, Mean Pressure on ART, CVP, ICP, PA, LAP etc to fulfill different positions invasive blood pressure measuring demands

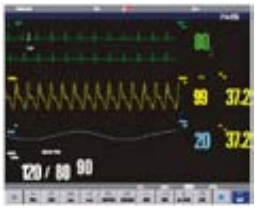
C02

Sidestream / Mainstream / Microstream EtCO2 is optional.

AG

Anaesthetic Gas module, measure concentration of Et & CO2, O2, N2O & ISO, ENF, DES, SEV, HAL

SpO2



High capacity against interference of ESU, motion & low perfusion (Masimo/Nellcor SpO2 is optional)

Solaris Handheld Vital Signs Monitor

- Bright 2.4"TFT LCD colour display
- Durable, compact and light weight
- Capnograph with waveforms
- SpO2 with waveforms
- Data storage for up to 100 patients - 72 hrs for each patient
- Wireless data transmission & temp
- Suitable for adult, paediatric and neonate
- Respironics: mainstream or sidetream

PATIENT MONITOR

Biolight V6 - Vital Signs Monitor

The V6 monitor is intended to be used for monitoring, displaying, reviewing, storing and alarming of multiple physiological parameters of patients, including Pulse Oxygen Saturation (SpO2), Pulse Rate (PR), Non-invasive Blood Pressure (NIBP), Carbon dioxide (CO2) and Temperature (Temp). The monitor is intended to be used in outpatient departments and emergency treatment rooms of hospitals, community clinics, private clinics and other medical institutions.

- 7" Colour Anti-glare TFT LCD Screen (234×480 pixels)
- NIBP, Digital SPO2, PR, Lithium Battery
- Battery operated >8 hours use
- Powerful record storage
- Size: 160×130×260mm(W×H×D)
- Weight: 2.5 kg (Including a lithium battery)

Optional:

1. *Touch Screen*
2. *Thermal recorder (includes 1 roll of paper)*
3. *EtCO2 (sidestream)*
4. *Nellcor SpO2*
5. *Infra-Red Ear Thermometer*

WITH MOBILE STAND

ECG MONITORS

Biolight E70 Digital12 Channel ECG

- 8 inch colour LCD with intuitive display (800x600 pixels)
- Displays 12 waveforms simultaneously
- Ease to use intuitive QWERTY keyboard design with multi-function shortcut keys
- Built in A4 thermal printer
- Fixed Memory of 300 groups of ECG data
- Support saving to Internal data, SD card and USB flash disk
- Defibrillator-proof, Pacemaker pulse rejection
- High-capacity data saving into built-in
- Review, transfer & reanalyse data
- Innovative digital filters for better performance
- Fast-speed baseline correction algorithm
- 24-bit high-resolution & 1000Hz high- frequency data sampling
- 24-bit high-accuracy data saving ensures accuracy of follow-up data analysis
- Rechargeable Lithium battery
- Included: 10-Wires patient cable (IEC), Chest Suction Electrode (6pcs/set), Limb Clip Electrode (4pcs/set) (IEC), Recording paper (3x roll, 215mm*20m), User munual

BIOE70

Option:

1. *Touch Screen*
2. *Recording paper (roll, 215mm*20m)*
3. *Recording paper (Z-Fold, 210mm*295mm*200p)*

Biolight E80 Digital12 Channel ECG

- 12 inch colour LCD with intuitive display
- Displays 12 waveforms simultaneously
- Portable , overturning & folding design
- Built in A4 thermal printer
- Fixed Memory of 300 groups of ECG data
- Defibrillator-proof, Pacemaker pulse rejection
- Review, transfer & re-analyse data
- Waterproof QWERTY keyboard design with multi-function shortcut keys
- Support saving to Internal data, SD card and USB flash disk
- Innovative digital filters for better performance
- Fast-speed baseline correction algorithm
- 24-bit high-resolution & 1000Hz high- frequency data sampling
- 24-bit high-accuracy data saving ensures accuracy of follow-up data analysis
- Included: 10-Wires patient cable (IEC), Chest Suction Electrode (6pcs/set), Limb Clip Electrode (4pcs/set) (IEC), Recording paper (3x roll, 215mm*20m), User munual

Option:

1. *Touch Screen*
2. *Recording paper (roll, 215mm*20m)*
3. *Recording paper (Z-Fold, 210mm*295mm*200p)*

Malem Universal ECG Alligator Clips

- Ultimate Easy ECG Clips (Pkt of 12 to suit USA and ISO Colour Standards) Locks on to tab electrodes
- Snap and Lock over stud electrodes
- Fits 3-4mm Banana Plugs
- Eliminates Twisting
- Holds Electrode Flat
- Superior Contact
- High Quality Tracing
- 2x Red, 2x Black, 2x Green, 2x Yellow, 1x Blue, 1x White, 1x Orange, 1x Violet

MALECL

Vitascan LT USB Bladderscanner

VitaScan USB probe and software installed on your computer secures easy access to bladder volume calculation. Vitascan LT is the perfect choice if you are looking for a flexible bladder monitor run by your computer.

- Real-time Ultrasound Bladder Monitor.
- 3D ultrasound probe & PC running windows XP/Vista
- USB ultrasound probe connection
- Simple and intuitive to use. User interaction through touch screen
- PreScan mode provided for easy and precise location of the urinary bladder
- Scan modes provided for a variety of patient types
- Bladder volume calculations in large digit
- View and save exams easily, creating EMRs for your patients
- Software to interface patient electronic journal
- Software updates via USB/Flash drive
- Optional mobile cart with locking wheel
- Includes carry case & software

Optional:

1. *Calibration Phantom (VIT100542)-$1,511+$151.10 GST*

VIT100525

Hearton Automated External Defibrillator (Available in Australia only)

- Fully automated for public use
- No training required
- SD card for event logging
- Automatically detects adult or paediatric pads
- Self checking with voice prompts
- LiMnO2 Battery with 5 year shelf life
- InfraRed communication to Laptop

1. *Adult Pad (MEDPADSA)*
2. *Child Pad (MEDPADSB)*

MEDA10

DEFIBRILLATORS

I-PAD Intelligent Public Access Defibrillator (Available in New Zealand only)

- Simple operation
- LED Status Indicators
- Patented Truncated Exponential shock waveform
- Automatic self-testing
- Especially designed for public usage
- Economic Standard Package

Information Button
• When pressed, guides the user during CPR and system trouble shooting
State LED
• Indicates operational state of the device
Battery Pack
• Disposable LiMnO2 Battery Pack
IrDA Port
• Used for data communication
Pads Connector Guide & LEDs
• Indicates the position of the pads connector
• Guide the user during rescue operation
Shock Button
• Delivers the shock

NF1200
• Size : 220 × 281 × 82 (W × L × H, mm)
• Weight : 2.2kg

Samaritan 500P Defibrillator with CPR Advisor

- Real-time feed-back while the rescuer is performing CPR.
- Patented CPR Advisor software provides guidance on compressions when performing CPR
- IP56 water and dust rating (highest in the industry)
- Drop tested from 1 metre onto concrete
- Aviation approved/Surf Life Saving Australia Approved
- Small, light and compact
- Tough carry bag as standard, with other cost-effective optional accessories
- Superior long-lasting and patented silver chloride electrode technology
- Patented technology
- 7 Year Warranty

1. *Adult Pad (MEDPADPAK03)*
2. *Child Pad (MEDPADSB)*

MED500P

Reanibex 200 Automated External Defibrillator

The REANIBEX 200 is an Automated External Defibrillator (AED), portable and lightweight ideal for rapid provision of the first treatment to patients suffering a sudden cardiac arrest. Made with the latest technologies in the field of defibrillation (biphasic waveform), incorporates a screen that allows not only the visualization of the user guidance messages but also of the ECG signal in real time. Very easy to use has only two operation buttons. The REANIBEX 200 gives simple, clear and detailed audio and visual instructions to guide the user through the entire procedure of resuscitation, which makes its use requires minimal training.

- High resolution LCD display
- Periodic self-tests
- "Ready-for-use" indicator
- Easy to operate: Only two operation buttons
- Action icons
- ECG and audio (optional) data storage

MED500P

Titan Tympanometer Middle Ear Analyser

In modern healthcare settings fast and reliable testing is essential. The Titan screener is built to meet these requirements in an easy and flexible way. Titan is a compact middle ear analyzer with all the functions and flexibility in a remarkably portable device. As a tool, Titan emphasises ease-of-use and speed without compromising test flexibilityand reliability.

- Portable & lightweight (360 grams)
- Hi-Res colour display
- Diagnostic test battery (tymp, reflex fixed, reflex growth, reflex contra, reflex decay, ETF1)
- Screening test battery (tymp, reflex fixed, reflex growth)
- Fully customisable
- Single hand operation
- Auto-start on seal
- Storage for 250 patients
- 3.5 hours continous test time
- NOAH3 and OtoAccess compliant
- PC integration & stand alone option
- Test cavities, carrying bag, eartip box included

Optional:

1. *Bluetooth (screening - optional)*
2. *Basic/clinical probe (screening - optional)*
3. *Cradle - (screening - optional)*
4. *OtoAccess™ (screening - optional)*

Sibelsound Audio Booth

The audiometric test booths S40 is light in weight, gets a high isolation index, has great functionality and is pleasant looking. The S40 booth has a lockable door & a window with double glazing that allows patient and operator to see each other, friendly illumination and the necessary connections to plug an audiometer with all of its accessories. All the audiometers in the market can be connected; including the computer based ones. The external surface is made of washable panels and the interior is comfortable. Its design allows for quick and easy assembly by non specialised personnel.

- Great noise attenuation, 46 dB SPL at 10Khz
- Quick and easy assembly
- Compatible to any audiometers in the market
- Great functionality and pleasant design
- Quick and easy assembly by non specialised personnel
- Maximum noise attenuation of 46dB SPL.
- Unforced ventilation system (via labyrinth).
- Window with double glazing.
- Suitable for all the audiometers on the market

Optional:

1. *Access ramp for wheelchairs*
2. *Connection pannel USB-RS232*
3. *Internal washable microperforated covering (DELUXE)*
4. *Fitted with casters for complete mobility*
5. *LED lighting*
6. *Folding table*
7. *Left or right hand door*
8. *Extra windows*
9. *5 standard models plus custom-built booths*

VARIOUS SIZES & MODELS AVAILABLE

SIBS40A

AUDIOMETRY

Amplitude T-Series Audiometer

The Amplitude T-Series is the ultimate in high quality, highly portable air and bone conduction audiometry. The T-Series models have the audiometer circuitry built right into the patient response switch, and they are operated wirelessly from a Windows® PC. Select the T4 model for air conduction and the T3 model for air and bone conduction testing. You can also choose from 3 types of transducers to match your preferences and testing environment.

- Wireless air and bone conduction testing
- Flexible manual and automated testing, including masking
- Rechargeable battery powered or 5V DC
- Portable and convenient for on-the-go testing
- Patented Design

Oscilla SM930 Screening Memory Audiometer

Oscilla® SM930 is a very versatile screener audiometer. It supports 3 automatic hearing tests (20 dB, 20 dB random and Hughson Westlake) and features a built-in memory of 90 audiograms. Furthermore the audiometer can be connected to a printer through the parallel port and transfer data to software programs like AudioConsole through the serial port.

- 11 frequencies: 125 - 8000 Hz
- 10 dB to 110 dB in steps of 5 dB
- Manual or automatic test (3 automatic tests) Serial and Parallel port.
- Very readable displays.
- Noise free push buttons.
- 4 automatic threshold tests.
- Storage capacity: 90 audiograms
- Calibration without entering the cabinet.
- 11 frequencies: 125Hz - 8000Hz (selectable)
- Option of visualizing the audiogram during the test

Oscilla SM910 Screening Memory Audiometer

Oscilla SM910 is a traditional screener audiometer. It is easy to use and supports an automatic 20dB test. The audiometer is available in a battery powered version (6 x 1.5V batteries) called SM910-B and a version called Sm910-S, that enables data transfer software programs like AudioConsole.

- Pulse tone
- Noise free push buttons
- Very readable displays
- 11 frequencies: 125Hz – 8000Hz
- Calibration without entering cabinet
- Now with internal battery pack (SM910-B)

Oscilla USB-300I

Oscilla USB-300I is a PC-based screener audiometer. The audiometer supports 4 automatic hearing tests (20dB, 20 dB random, XX dB random and hughson westlake). Furthermore you can deactivate frequencies which is useful if you have one or more frequencies that are not tested.

- 11 Frequencies: 125-8000 HZ
- 10 dB to 110 dB in steps of 5 dB
- Manual or automatic test
- Power supply via USB
- Audio Console software

ELECTROSURGICAL

Zeus 50 Electrosurgical

- Compct, easy and quick to set up
- For general electrosurgery needs in the office, clinic or emergency room
- Exceptional performance, reliability & safety
- Provides necessary functions like Pure Cut & Coagulation
- Twin Button Handles provide remote-control function
- Safely prevents an over current from flowing through the equipment
- Includes Disposable Twin button handle Silicon Patient plate (110x80mm)

Zeus 80/100 Electrosurgical unit

ZEUS-100/ 80 is suitable for outpatient practice which meets all the demands of outpatient medical practice with monopolar and bipolar coagulation as well as monopolar cutting. At a reasonable price.

- Apply to plastic surgery, ophthalmology.
- Pure cut and Blend cut function.
- Contact coagulation and Bipolar coagulation.
- Displays output power as digits on the window.
- Check the output power easily during the procedure.

Zeus 200S/150 Electrosurgical unit

ZEUS-200S/150 can be used where private practice and outpatient clinics.

- Simple operation.
- Best Safety with Feedback system.
- REM(Return Electrode Monitoring) monitors the size of contact area between a patient and the pad. If the size is inappropriate, it automatically blocks the High-frequency current to minimize the danger of burning incidents.
- Auto select function
- Without pressing cut or coagulation button, can select working mode by usign
- Twin button handle & double footswitch.
- Reach max output power quickly
- Press each mode button for 3 sec, the power is set 1 W, so it enables to control from 1 W to maximum output power quickly.
- ZEUS-200s compatibles with Argon-Z(Argon Plasma Coagulation)

ZEUS-400/300/200 Electrosurgical unit

ZEUS-400/300/200 is one of the most popualr models among ZERONE's products, which use for universal purpose.

- 4 kinds of cut, bipolar and monopolar coagulation.
- Distinguish each working condition by audio sound and LED lamp.
- Best safty with Feedback system.
- REM(Return Electrode Monitoring)monitors the size of contacting area between a patient and the pad, if the size is inappropriate, it automatically blocks the high-frequecy current to minimize the danger of burning incidents.
- Stable output power.
- Unit can stably and stragithly output power by using micro processor.

LOUPES/HEADLIGHTS

JJ Medical Binocular Loupes

- Lightweight & comfortable design
- Great focus & clarity for precise operation
- Flip-up feature when not in use

- Multiple: 2.5
- Visual field (mm): 120
- Depth of field (mm): 80
- Focal point (mm): 420

JJ Medical Simple LED Headlight with 2.5x Loupe

- 3w 1xLED white light
- Loupe magnification 2.5X
- Visual field (mm): 120
- Depth of field (mm): 80
- Focal point (mm): 420
- Flip up loupe when not in use
- Colour temperature: 6000k
- 9500 Lux at 250mm
- 10hr battery
- 20,000 hr LED life

JJMC401

JJ Medical B2 LED Headlight

- Adjustable spot size from 40mm & 150mm at 1m
- Comfortable & adjustable hoop
- 3W LED white light
- Colour temperature: 6000k
- 9500 Lux at 250mm
- 20,000 hr LED life
- 10 hr battery
- Lighthead weight: 80g

JJMB2LEDP

JJ Medical 3 Watt LED Headlight with Loupe

- 3w LED white light
- Comfortable & adjustable headband
- Loupe magnification 2.5X or 3.5X
- The loupe can flip up when not in use
- Adjustable spot size at 250mm ranging from 6mm to 65mm
- Colour temperature: 6000k
- 9500 Lux at 250mm
- Lighthead weight: 80g
- 10hr rechargeable battery
- 20,000 hr LED life

JJMC301 - 2.5X JJMC30235 - 3.5X

OEC LED Headlight

- CREE LED cold light for supreme colour rendering (5500K - very close to natural sun light)
- Spot zoom control (70mm-130mm) at working distance of 300mm
- Adjustable illumination (2800-7000 Lux) at working distance of 300mm
- Light & long lasting built in lithium battery (3-8hrs)
- Even luminance with sharp edge spot
- Cable free for convenient use
- LED life of 50,000 hours

Option:

1. *Magnifying loupes for higher precision*
2. *Portable back-up battery pack for longer operating time*

CHILHII

Loupes & Exrta Battery Option

CRYOTHERAPY/THERMOMETER

Cryoalfa Super Blister Pack (Includes 1 Cartridge)

- Cartridges easily replaced without any leaking
- Simple and secure handling
- Extremely precise application
- Constant penetrating temperature of –89°C
- Usable for almost all skin-changes
- No destruction of biological function and structures
- Excellent cosmetic effects, almost no scar formations
- Non bleeding treatment, no anaesthesia required
- Practically painless, suitable for children
- Usable in case of a high operation risk or inoperability
- Majority of symptoms disappear after single use
- No long waiting times in hospitals and specialised clinics
- Post treatment care is minimal
- A 16gm cartridge lasts for approx 30 x 10 second applications

Option:

1. *16gm Replacement Cartridge with flow stop valve (CRYCCA16L)*
2. *25gm Replacement Cartridge with flow stop valve (CRYCCA25L)*

SCOPES

Miis Horus Scope - 3 In 1 Digital Diagnostic Set

This new system, which is designed specifically for Telemedicine, is an easy-to-use hand-held video system used for capturing images of the body. This system utilizes interchangeable attachments making it ideal for mulit-discipline medical applications. Attachments for ear nose & throat, dermatology, ophthalmology, audiology, women's health, and general examinations are just a few of the potentials of this unique system.

The HORUS System incorporates High Definition (1080p) camera technology and offers multiple video output options for connections to your co-dec. Still images and videos can also be captured with just the touch of a button and transferred seamlessly to a laptop or PC for store and forward applications.

Each specialty attachment can be quickly and easily changed just by twisting the optic and removing it from the scope handle. This unique feature allows you to have just one system with multiple uses. Conveniently located controls make the system extremely user friendly. Most functions can be controlled with just your thumb. Illumination is provided by powerful integrated LED's while the 1080p High Definition images are captured and displayed on the full colour LCD display.

VIDEO OTOSCOPE LENS

- 10x Optical magnification
- 5-25 mm focus range
- Natural white LED light source
- 3.5" full colour TFT-LCD display
- 8.5 (cm) x 9 (cm) x 20 (cm)
- Digital photograph for ear canal and tympanic membrane
- Charge cradle included

GENERAL LENS

- For general purpose use
- Natural white LED light source
- 3.5" full color TFT-LCD display
- Digital photograph
- Charge cradle included

DERMATOSCOPE LENS

- 10x Optical magnification
- Field of view (FOV): 10mm (diameter)
- Natural white LED light source with polarizer
- 3.5" full colour TFT-LCD display
- Size: 8.5 (cm) x 8 (cm) x 20 (cm)
- Charge cradle included

Goldline Biocam 2.0 Video Otoscope

The BioCam2.0™ takes video otoscopy one step further. This cutting edge device, designed with precision makes ear examination simple, practical, and accurate. This one of a kind video otoscope has multi-use capabilities, giving medical professionals more flexibility in one device

- Light weight, ergonomic and easy to use
- Hi-Res images & video
- Freeze frame function
- Easy dignosis of eardrum & middle ear
- BioTip® come in many sizes
- Patients can see what you are viewing
- USB compatible with any laptop or CPU

*Laptop not included

Aperture for HS-OP10

- Large spot used for normal fundus examinations
- Small spot used for reduced reflection with small pupils
- Cross spot used for determination of central or eccentric fixation
- Hemi-spot used for reduced reflection with small pupils
- Red-free filter for contrast-enhancement when assessing fine vascular disorders.
- (Different aperture is available at customers' request)

HONHSOP10

410-0010

3.5V Coaxial Ophthalmoscope

Coaxial optics enable easy entry into undilated pupils for more accurate diagnoses, while two filter selections provide optimum light levels for entering healthy eyes and those with cataracts.

- >> Coaxial optics enables easy entry into undilated pupils through precise lamp filament and optical alignment
- >> 3.5V Halogen lamp provides light output for true tissue color and consistent, long-lasting illumination
- >> 28 lenses from 0D、±1D、±2D、±3D、±4D、±5D、±6D、±7D、±8D、±9D、±10D、+12D、±15D、±20D、−25D、+40D.
- >> 18 unique aperture/filter combinations for greater versatility.

6 Standard Apertures

Cobalt bule filter, Micro spot, small spot, large spot, Slit, Fixation aperture.

With Red-free filter

Cobalt bule filter, Micro spot, small spot, large spot, Slit, Fixation aperture.

With Cross-linear Polarizing filter

With Red-free filter

68 Lenses

3.5V PRO Coaxial Ophthalmoscope

Coaxial optics enable easy entry into undilated pupils for more accurate diagnoses, while two filter selections provide optimum light levels for entering healthy eyes and those with cataracts,68 focusing lenses combine for premium quality.

- >> Coaxial optics enables easy entry into undilated pupils through precise lamp filament and optical alignment
- >> 3.5V Halogen lamp provides light output for true tissue color and consistent, long-lasting illumination
- >> 68 lenses in single-diopter steps for precise resolution (+38D to-30D).
- >> 18 unique aperture/filter combinations for greater versatility.

Apertures:

- Micro-Spot Aperture:
  allows quick entry into small, undilated pupils.
- Small Aperture:
  provides excellent view of fundus through an undilated pupil.
- Large Aperture:
  standard aperture for a dilated pupil and general examination of the eye.
- Fixation Aperture:
  has graduated cross-hairs for measuring eccentric fixation or locating lesions.
- Slit:
  used to determine levels of lesions and tumors.
- Red-free Filter:
  Excludes red rays from examination field for easy identification of veins, arteries and nerve fibers.

OTOSCOPE

460-0010

Set complete with:
OT8C Fiber Otoscope,
1 set (2. 5mm and 4mm,
5 pcs for each) of reusable
specula, hard case

460-0012

Ear-specula

OT8C Fiber Otoscope

The Otoscope is used to view the tympanic membrane and external ear canal to diagnose outer and middle ear pathologies. It is the mostly used device in ENT.

- >> Fiber optics transmit light system, the fiber optics extend to the tip of the instrument for more light output, less glare.
- >> 2.5 x magnification
- >> Disposable Specula: 2.5mm and 4.0mm
- >> Insufflation Port: view tympanic membrane using an insufflator bulb.
- >> OT8C is available with AA alkaline or Ni-MH batteries. The model of the bulb is T4954, 2.5V, 1.6W.
- >> Smart design, convenient for mobile diagnosis.

Ordering Information

Item	Description
460-0010	OT8C Fiber Otoscope complete set
460-0012	OT8C Fiber Otoscope
460-0061	2. 5mm reusable ear-specula
460-0063	4. 0mm reusable ear-specula
460-0910	T4954 2. 5V Spare bulb
461-0050	Insufflator Bulb with Tube

Reusable Ear-specula

- >> Reusable tips, autoclavable at up to 134°C, 10 mins.
- >> Made of high-density Polypropylene with smooth internal finish.
- >> Positive locking design. Firm fit to the otoscope head.
- >> Compatible with OT8C Fiber Otoscope only.

Ordering Information

Item	Description
460-0061	Resuable Ear-specula, 2.5mm
460-0063	Resuable Ear-specula, 4.0mm
460-0071	Pack of 200 pcs. 2.5mm dia. 200 pcs./pack
460-0073	Pack of 200 pcs. 4.0mm dia. 200 pcs./pack

3.5V Fiber Otoscope

>> >2.0x maginification

>> 3.5V Halogen bulb

>> Sealed system for pneumatic otoscopy and accurate diagnosis of otitis media.

>> Swivelling Wide-angle viewing lens allows for nstrumentation under magnification.

Ear-specula

Reusable Ear-specula

>> Reusable tips, autoclavable at up to 134°C, 10 mins.

>> Made of high-density Polypropylene with smooth internal finish.

>> Positive locking design. Firm fit to the otoscope head.

>> Compatible with 3.5V Fiber Otoscope only.

Ordering Information

Item	Description
461-0065	Resuable Ear-specula, 2.7mm 1 pcs
461-0067	Resuable Ear-specula, 4.2mm 1 pcs
461-0075	Pack of 200 pcs, 2.7mm dia. 200 pcs./pack
461-0077	Pack of 200 pcs, 4.2mm dia. 200 pcs./pack

DIAGNOSTIC ACCESSORIES

461-0050

Insufflation Bulb

>> For pneumatic testing
>> Compatible with 3.5V Fiber Otoscope and OT8C Fiber Otoscope

Ordering Information

Item	Description
461-0050	Insufflation Bulb with Tube

461-0060

Ear-specula Dispenser for all specifications

>> For OT8C Fiber Otoscope and 3.5V Fiber Otoscope.
>> The dispenser holds all specula sizes within a series, prepares a clean new specula for each and every patient.
>> Dispenser is available with an without a storage compartment.

Ordering Information

Item	Description
461-0060	Specula Dispenser

489 3.5V Lithium Ion Rechargeable Handle

>> Half the weight of traditional handles ,fits more comfortably in your hand;
>> Fits all 3.5 V Instrument Heads;
>> The handle enable continuously adjustable brightness;
>> Made of High temperature engineering materials ABS.

Ordering Information

Item	Description
489-0010	489 3.5V Lithium Ion Rechargeable handle with battery

489-0010

490-0010

490 3.5V Lithium Ion Rechargeable Handle

>> High-quality metal construction for strength and durability
>> Automatic connector: Quick, safe connection, fitted all 3. 5V head.
>> Rheostat: stepless brightness control
>> Automatic ON/OFF: If the handle is switched on when replaced in the charger, it automatically switches off. When removed, it switches on again.
>> Rechargeable lithium battery can be replaced after a long time

Ordering Information

Item	Description
490-0010	490 3.5V Lithium Ion Rechargeable handle with battery

DT801

DT802

Desk Charger

- >> Compact, portable unit provides convenient recharging;
- >> Switch mode: Single-Cell/Two-Cell Li-ion/Li Polymer Battery Charger
- >> Precharge-CC-CV Operation model
- >> Short circuit , reverse-voltage ,over-voltage protection. Low Battery Status Indicator
- >> Charge status indication by yellow-green LED

Ordering Information

Item	Description
487-1000	DT801 Desk Charger Set
488-1000	DT802 Desk Charger Set

485 Wall Mount Transformer

- >> Automatic switching on/off of handles when removing or replacing them in the handle unit saves energy and increases the service life of the lamps.
- >> Provides a constant 3.5V output voltage independent of mains voltage fluctuations.
- >> Advanced, ergonomic handle design. Continuous brightness control on the handle. Quality spiral cords with a comfortable working radius of up to 3 m. Instrument locks as standard equipment prevent unauthorised removal.

STETHOSCOPES

Honsun Cardiology Stainless Steel Stethoscope

- 48mm diameter silver dual head chestpiece
- The small deep cone-shape chestpiece is used for auscultating of cacophony, or slight and low frequency sound
- Stainless steel chestpiece, excellent sound conduction
- Comfortable dual anti-chill ring design
- 'A' shape tube ensures superior sound conduction
- Connecting spring is embedded, ear tip is specially designed for suiting the ear structure
- Thick tube has excellent resistance to ambient interference
- Includes a pair of Metal ear tips, a pair of soft ear tips and a replaceable membrane

HONHS30K

Honsun Adjustable Single Head Stethoscope

- 48mm diameter silver single head chestpiece
- Ergonomic design for comfortable use
- Low frequency and high frequency sound
- Connecting spring is embedded, ear tip is specially designed for suiting the ear structure
- Zinc alloy chestpiece with excellent sound conduction, little acoustic attenuation
- PVC soft ear tips

HONHS30W

Honsun Dual Head Nurses Stethoscope For Child

- Silver dual head chestpiece for child, sensitive 38mm membrane for sound collecting
- The small bell-like chestpiece is used for auscultating of slight and low frequency sound
- Considerate dual anti-chill ring design
- Connecting spring is embedded, eartip is specially designed for suiting the ear structure
- Aluminium alloy chestpiece, good sound conduction

HONHS30M

Honsun Dual Head Nurses Stethoscope For Adult

- Silver dual head chestpiece for adult, sensitive 47mm membrane for sound collecting
- The small bell-like chestpiece is used for auscultating of slight and low frequency sound
- Considerate dual anti-chill ring design.
- Connecting spring is embedded, ear tip is specially designed for suiting the ear structure
- Aluminium alloy chestpiece, good sound conduction

HONHS30L

SPHYGMOMANOMETER

Honsun Palm Type Sphygmomanometer

- ABS plastic for case and handle
- Large 65mm diameter dial
- Plastic deflation valve: 'Push' for rapid deflation, 'screw' for precise deflation
- Nylon cuff with D-ring
- 1-tube PVC bladder
- PVC bulb
- Plastic end valve
- Nylon carry bag

HONHS201U

Honsun Palm Type Sphygmomanometer with Luminous Dial

- Comfortable ergonomic modern design with aluminium ring
- Easy to read luminous 62mm (diameter) dial
- "UP & DOWN" testing
- Concave frame avoids damage to the meters glass
- Two position design for deflation vale is convenient for operation
- ABS Plastic case, PVC Bulb
- Nylon Cuff With D-ring
- 1-Tube Adult PVC Bladder
- Black Nylon Carrying Bag

HONHS201V

Honsun Standing Type With ABS Basket Sphygmomanometer

- Square shape 145mm×145mm dial
- Metal caster
- 360° swivel for easy-reading
- Gradient adjustable for easy-reading
- 5-wheel stand with brake
- Adjustable aluminum pole with Plastic basket (With range of 85cm-125cm)
- Cotton cuff with D-ring
- 2-tube adult latex bladder
- Standard latex bulb
- Air-release valve with spring
- Standard end valve
- Spiral PVC tubing

HONHS70A

Honsun Standing Type With ABS Basket Sphygmomanometer

- Round shape dial of 147mm diameter
- Special precise mechanism
- Metal caster with 5-wheels & brake
- 360°swivel for easy reading (P1)
- Gradient adjust for easy reading (P2)
- Adjustable aluminum pole with metal basket
- Nylon cuff with D-ring
- 2-tube adult latex bladder
- Standard latex bulb
- Air-release valve with spring
- Standard end valve
- Spiral PVC tube (1.8 m)
- Plastic connector

HONHS70C

BLOOD PRESSURE MONITOR

Honsun Mercury Free Digital Blood Pressure Monitor

- Korotkoff sound method without mercury
- Manual inflation and deflation
- Simultaneous display of digital and scale makes the readings more precise
- 90° and 100° viewing angle design makes the operation more conveniently
- More economy with only AAx2 batteries to be used
- Backlight display
- Automatic power off after 3 minutes of no operation
- Low battery indication
- One-touch operation to record the measurement result

HONLD25

Honsun Upper Arm Auto Digital Blood Pressure Monitor

- One-touch operation
- Inbuilt semi-conductor sensor ensures accuracy
- 90 sets of memories
- Easy to read erect design
- Average value for the latest 3 readings
- Display of systolic pressure, diastolic pressure & pulse rate simultaneously
- Automatic power off after 3 mins

HONLD578

Honsun Deluxe Auto Digital Blood Pressure Monitor

- Extra large LCD Display with Date & Time display
- 2 Users with 60 sets of memory each
- Average value for the latest 3 readings
- Ambient temperature display
- WHO (blood pressure classification indication)
- IHB (irregular heartbeat) detector
- 3 sets of alarms
- Low battery indication
- Storage case included
- Auto off after 3 mins

HONLD582

BTL Ambulatory Blood Pressure Monitor

The BTL-08 ABPM is a non-invasive ambulatory blood pressure monitor. The monitor uses oscillometric method and its design and construction fully comply with the latest in blood pressure monitoring standards. The ABPM algorithm guarantees high quality examination even under difficult operating conditions. The state-of-the-art module with functional design ensures patients comfort.

- 24 or 48 hour sequential blood pressure monitoring
- Stepwise deflation for better patient comfort
- Large and easy to read display
- 2 x AA batteries
- Noise free operation and lightweight module
- Fast communication between the unit and PC
- Blood pressure analysis
- Both graphical and tabular interpretation
- Simple, short yet fully comprehensible report
- Complies with both BHS and AAMI standards
- Includes: basic unit, pouch, belt, optical/USB interface, standard size cuff carry case and Software

Optional:

1. *ABPM without software (BTLC601101V200)*
2. *Standard Cuff (BTLC601104V100)*
3. *Large Cuff (BTLC601105V100)*
4. *Small Cuff (BTLC601106V100)*

BTLC601100V200

ABI MONITOR/REFRIGERATION

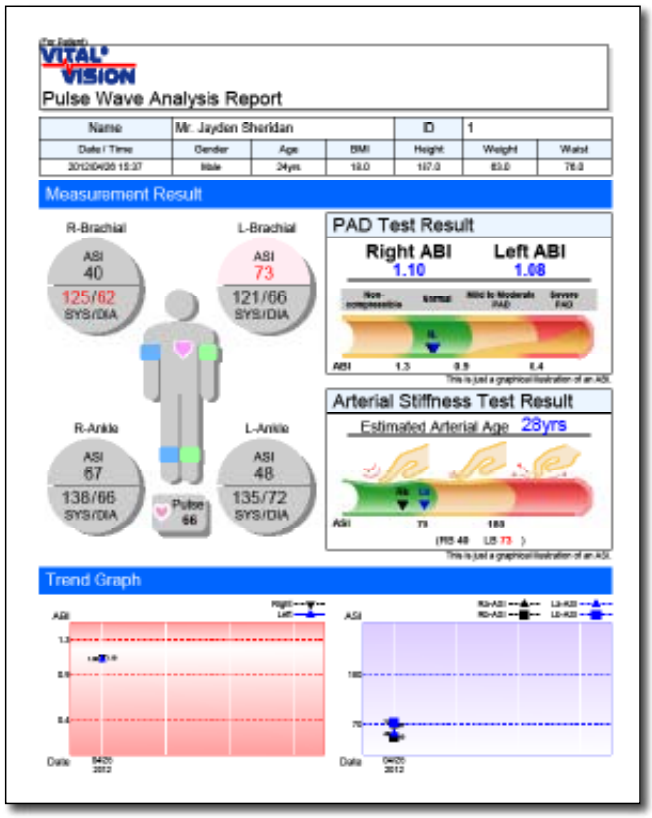
Mars Professional Hemodynamics Monitor

Uncover your patients circulatory risk factor with the Professional Hemodynamics Monitor. An inexpensive, rapid, non-invasive, device to help in uncovering those patients who are at risk for Circulatory Disease. (Suitable for hospitals, clinics.)

- 4 limb similtaneous measurement
- Connect to PC via USB port
- Stores a large number of patient history in PC
- Metabolic Syndrome Classification
- Estimate GFR data can be stored
- Cholesterol, LDL/HDL-Cholesterol, Glucose & Triglycerides data can be stored and used for Framingham Risk Analysis

The MS-2100 Hemodynamics Analyser's tests include:

- *ABI (Ankle Brachial Index)*
- *ASI (Arterial Stiffness Index) patented*
- *BPM (Blood Pressure Measurement)*
- *IHB (Irregular Heart Beat) and more*



Auto PC Analysis Report

Nuline HR Series Vaccine Refrigerators

- Digital Temperature Indicator
- Fan Forced System
- Door Lock
- Interior Lighting
- Built In Alarms With High-Low Read Out
- Auto defrost & water disposal

The system includes:

- *Auto- dialler which enables protection of stock and automatically dials your contact*
- *number if the power fails*
- *Computer data-logger*
- *Chart recorder*
